***YOUR GOALS. OUR SOLUTIONS.***

## PREVENTIVE MAINTENANCE

Proactive, preventive maintenance helps protect your investment. Champion can provide a full control system analysis with informative reports highlighting any items that need attention, and provide the solution to address each issue.

## DISASTER RECOVERY

Disaster can strike at any time. Whether a full automatic backup system or scheduled backups with off-site storage, Champion can help minimize down time in the event of disaster – man-made or natural.

## PROCEDURE DEVELOPMENT & DOCUMENTATION

Consistency is key to success. That applies to your control system. Champion can ensure proper configuration, patches and backups are executed by best practice procedures.

## REMOTE ACCESS

Champion = Trust. Using Industry Cybersecurity guidelines, Champion's GICSP certified personnel can provide services through remote access to help you maintain operation or get back up and running.

## ASSET MANAGEMENT

Are you one part away from a shutdown? Let Champion manage your control system assets and parts inventory. We have a program that fits your needs to ensure you have the part you always need.

## CONTROL SYSTEM SECURITY MONITORING

Champion's Security Operations Center (SOC) monitors your control system for security risks with live-operator monitoring. We will alert you of any possible abnormalities or risks so they can be mitigated ASAP.

## CYBERSECURITY SERVICES

How safe and secure is your control system? Champion can perform a cybersecurity analysis and issue a report detailing any potential abnormalities or risk items including those that don't meet industry standards.
